

Kritika Tripathi

mahitripathi966@gmail.com | [LinkedIn](#) | [Github](#) | [Portfolio](#) | +91-9517092236 | Lucknow, Uttar Pradesh, India

EDUCATION

Shri Ramswaroop Memorial University

Bachelor of Technology in Computer Science & Engineering

Lucknow, Uttar Pradesh, India

Graduation Date: Jun 2027

Relevant Coursework: Data Structures & Algorithms, OOP (Java), Artificial Intelligence, Machine Learning, Web Development, DBMS

WORK EXPERIENCE

Quantaliez

AI Full Stack Developer Intern

Lucknow, Uttar Pradesh, India

Jun 2026 – Present

- Contributing to full-stack AI product development across frontend and backend layers in an on-site startup environment, collaborating directly with a cross-functional product team.
- Engineered high-performance RESTful microservices and asynchronous database queries, accelerating AI model response times by 35%.
- Architected responsive component-driven user interfaces in React.js, ensuring cross-device compatibility and seamless real-time AI telemetry data visualization.

Alfido Tech

AI Engineering Intern (Part-Time)

Remote

May 2026 – Present

- Built AI-powered features and prompt engineering pipelines in Python; shipped full-stack AI workflows (React.js + FastAPI) to production on Hugging Face Spaces.
- Engineered context-aware LLM prompt orchestration pipelines that reduced token overhead and inference latency across multi-modal queries.

Cosmodex

AI Chatbot Development Intern

Remote

Jun 2026 – Sep 2026

- Building conversational AI chatbots with workflow automation, third-party API integrations, and prompt optimization to improve response accuracy by 40%.
- Devised automated webhook pipelines and state management protocols to streamline query resolution and multi-turn customer dialogues.

Netcamp Solutions Pvt Ltd

Summer Intern – Networking & App Development

Ghaziabad, Uttar Pradesh, India

Jun 2026 – Jul 2026

- Trained in Ethical Hacking & Networking, Android Development (Java/Kotlin), and Web Development (Python); delivered 3 live projects adhering to strict cybersecurity benchmarks.
- Configured network packet inspection pipelines and implemented secure client-server socket communication protocols.

Cognifyz Technologies

Full Stack Development Intern

Remote

Jan 2026 – Apr 2026

- Built RESTful APIs with JWT authentication using Node.js and Express.js, implementing secure user authentication and data-handling endpoints.
- Developed 5+ responsive React.js pages, ensuring cross-device compatibility, state caching, and clean component-based architecture.

GSSoC 2025 & ELUSOC 2025

Software Contributor – Open Source (Global Summer of Code)

Remote

2025 – 2026

- Merged code improvements and bug fixes into open-source JavaScript/React.js repositories as part of global open-source contribution programs.

PROJECTS

RippleGraph AI — Predictive Supply Chain GNN

Deep Learning Engineer

India

Mar 2026 – Apr 2026

- Pioneered a GraphSAGE Graph Neural Network (GNN) to analyze 29-node supplier networks, achieving 94.2% confidence predicting per-node daily risk scores 45 days in advance.
- Established a three-agent AI pipeline (Monitor, Analyst, Recommender) using Google ADK to evaluate cascade disruption severity and generate preventative mitigation protocols.
- Transformed system resilience by optimizing an 848 KB machine learning model and backend logic to run fully offline, eliminating reliance on cloud LLM infrastructure.

EV_Q — Smart EV Expert System

AI Systems Engineer (3rd Place, AgentathonX 2026)

India

Jan 2026 – Feb 2026

- Conceived a multi-agent AI architecture utilizing Gemini AI and Google ADK to orchestrate 5 specialized diagnostic agents, accelerating query resolution by 60% against 50+ national teams.
- Refined electric vehicle data pipelines through cleaning and feature engineering across 18+ sensor telemetry streams, optimizing predictive processing for sustainable mobility.

- Launched a Streamlit dashboard integrating real-time telemetry and 7 drive modes, delivering actionable predictive insights to non-technical stakeholders.

ContriFlow — Open Source Workflow Orchestrator

India

Full Stack Engineer

Dec 2025 – Jan 2026

- Engineered an automated triage and synchronization engine for distributed developer teams, reducing PR review cycle times by 45%.
- Integrated real-time GitHub Webhook listeners, milestone tracking pipelines, and automated contributor recognition leaderboards across multiple repositories.
- Developed an interactive React.js dashboard with modular component architecture and responsive state synchronization.

TwinMind AI — AI-Powered Productivity Assistant

India

AI / Full Stack Developer

Nov 2025 – Dec 2025

- Architected an NLP pipeline for real-time mood and cognitive burnout detection served across 9 high-throughput REST endpoints.
- Shipped full-stack AI workflows (FastAPI + React.js) to production on Hugging Face Spaces with sub-200ms latency.
- Built sentiment scoring algorithms and productivity telemetry dashboards to assist engineering squads in tracking wellbeing.

SKILLS

Languages: Python, Java (Core Java, OOP), JavaScript, C, SQL, HTML5, CSS3

Deep Learning & Core ML: PyTorch, Graph Neural Networks (GraphSAGE), Streamlit, Predictive Modeling, Computer Vision, Scikit-Learn

Generative AI & Architecture: Multi-Agent Systems, RAG Pipelines, Vector Databases (Pinecone, ChromaDB), LLMs, Prompt Engineering, LangChain

APIs & Integration: REST APIs, RESTful API Design, JSON, HTTP, JWT Authentication, API Integration, Webhooks

MLOps, Cloud & Full-Stack: End-to-End ML Pipelines, Docker, FastAPI, React.js, Node.js, Express.js, PostgreSQL, MySQL, Firebase, Git, GitHub

ACHIEVEMENTS & CERTIFICATIONS

- **3rd Place – AgentathonX 2026** (National AI Hackathon, 50+ teams); **6th Place – Viveka Hackathon** (SRMU Techfest 2026, 30+ teams).
- **Finalist, Top 10 – NHAI Hackathon**; Finalist – Cognizant Hackathon & Elite Her Hackathon (National-level competitions).
- **Participant – Smart India Hackathon (SIH)**, developed solutions for real-world government problem statements.
- **Certifications:** Intro to Machine Learning – NPTEL, IIT Madras; Ethical Hacking & Networking, Android Dev (Java/Kotlin), Web Dev with Python – Netcamp Solutions.
