EDUCATION

Shri Ramswaroop Memorial University

Bachelor of Technology in Computer Science & Engineering

Lucknow, Uttar Pradesh, India

2023 – Jun 2027

Coursework: Data Structures & Algorithms, OOP (Java), Artificial Intelligence, Machine Learning, Web Development, DBMS

SKILLS

Languages: Python, Java (Core Java, OOP), JavaScript, C, SQL, HTML5, CSS3

Deep Learning & ML: PyTorch, Graph Neural Networks (GraphSAGE), Streamlit, Predictive Modeling, Computer Vision, Scikit-Learn

GenAI & Architecture: Multi-Agent Systems, RAG Pipelines, Vector Databases (Pinecone, ChromaDB), LLMs, Prompt Engineering, LangChain

Backend & MLOps: REST APIs, RESTful API Design, JSON, HTTP, JWT Authentication, API Integration, Webhooks, End-to-End ML Pipelines, Docker, FastAPI, React.js, Node.js, Express.js, PostgreSQL, MySQL, Firebase, Git, GitHub

WORK EXPERIENCE

Quantaliez

AI Full Stack Developer Intern

Lucknow, Uttar Pradesh, India

Jun 2026 – Present

- Contributing to full-stack AI product development across frontend and backend layers in an on-site startup environment, collaborating directly with cross-functional product teams.
- Engineered high-performance RESTful microservices and asynchronous database queries, accelerating AI model response times by 35%.
- Architected responsive component-driven user interfaces in React.js, ensuring cross-device compatibility and seamless real-time AI telemetry data visualization.

Alfido Tech

AI Engineering Intern (Part-Time)

Remote

May 2026 – Present

- Built AI-powered features and prompt engineering pipelines in Python; shipped full-stack AI workflows (React.js + FastAPI) to production on Hugging Face Spaces.
- Engineered context-aware LLM prompt orchestration pipelines that reduced token overhead and inference latency across multi-modal queries.

Cosmodex

AI Chatbot Development Intern

Remote

Jun 2026 – Sep 2026

- Building conversational AI chatbots with workflow automation, third-party API integrations, and prompt optimization to improve response accuracy by 40%.
- Devised automated webhook pipelines and state management protocols to streamline query resolution and multi-turn customer dialogues.

Netcamp Solutions Pvt Ltd

Summer Intern – Networking & App Development

Ghaziabad, Uttar Pradesh, India

Jun 2026 – Jul 2026

- Trained in Ethical Hacking & Networking, Android Development (Java/Kotlin), and Web Development (Python); delivered 3 live projects adhering to strict cybersecurity benchmarks.
- Configured network packet inspection pipelines and implemented secure client-server socket communication protocols.

PROJECTS

RippleGraph AI — Predictive Supply Chain GNN | GraphSAGE GNN, PyTorch, Google ADK, Python

Mar 2026 – Apr 2026

- Pioneered a GraphSAGE Graph Neural Network (GNN) to analyze 29-node supplier networks, achieving 94.2% confidence predicting per-node daily risk scores 45 days in advance.
- Established a three-agent AI pipeline (Monitor, Analyst, Recommender) using Google ADK to evaluate cascade disruption severity and generate preventative mitigation protocols.
- Transformed system resilience by optimizing an 848 KB machine learning model and backend logic to run fully offline, eliminating reliance on cloud LLM infrastructure.

EV_Q — Smart EV Expert System | Multi-Agent AI, Gemini AI, Google ADK, Streamlit

Jan 2026 – Feb 2026

- Conceived a multi-agent AI architecture utilizing Gemini AI and Google ADK to orchestrate 5 specialized diagnostic agents, accelerating query resolution by 60% against 50+ national teams.
- Refined electric vehicle data pipelines through cleaning and feature engineering across 18+ sensor telemetry streams, optimizing predictive processing for sustainable mobility.
- Launched a Streamlit dashboard integrating real-time telemetry and 7 drive modes, delivering actionable predictive insights to non-technical stakeholders.

ContriFlow — Open Source Workflow Orchestrator | React.js, Node.js, GitHub API, Open Source

Dec 2025 – Jan 2026

- Engineered an automated triage and synchronization engine for distributed developer teams, reducing PR review cycle times by 45%.
- Integrated real-time GitHub Webhook listeners, milestone tracking pipelines, and automated contributor recognition leaderboards across multiple repositories.
- Developed an interactive React.js dashboard with modular component architecture and responsive state synchronization.

ACHIEVEMENTS

- **3rd Place** – AgentathonX 2026: National AI Hackathon with 50+ national engineering teams competing.
- **6th Place** – Viveka Hackathon: SRMU Techfest 2026 among 30+ engineering squads.
- **Finalist, Top 10** – NHAI Hackathon: Selected in top 10 for national highway AI intelligence solutions.
